

## Work Experience

---

<b>Software Engineer</b>	Workspace Infotech Limited Dhaka, Bangladesh	<b>Sep, 2021–Present</b>
--------------------------	---	--------------------------

- Built 4+ web applications with React and Next.js from the ground up as the Lead Front End Developer.
- Collaborated closely with both UI/UX and API teams to build web applications that have served 1000s of users.
- Constructed web applications that have consistently scored more than 90% in the lighthouse test.
- Spearheaded web application rewrites resulting in 40% decrease in load time and more accessible experience for the end users.
- Mentored 5+ colleagues on React and helped them on board projects.

<b>Full Stack Developer</b>	Oiiu Dhaka, Bangladesh	<b>July, 2020–August, 2021</b>
-----------------------------	---------------------------	--------------------------------

- Developed and maintained the serverless GraphQL backend that scaled to 100s of instances serving 1000s of API requests per minute.
- Implemented and maintained the Next.js e-commerce platform that served 1000s of users.
- Lead development on building internal tools that lead to 20% increase in user engagement, facilitated order tracking and analytics.
- Spearheaded moving the backend from a monolithic GraphQL Server to a Mesh GraphQL Server with BigCommerce integration.
